Proceedings of the State Environment Impact Assessment Authority Kerala

Present: Prof. (Dr.) K.P. Joy, Chairman; Dr. J. Subhashini, Member and Sri. P.H.Kurian, I.A.S., Member Secretary.

Sub: SEIAA- Environmental Clearance for the quarry project of Mr.Jose John, Managing Director of M/s.Trissur Sand and Gravel Pvt Ltd of in Sy. Nos. 1476/1, 1476/10, 1476/2, 1476/4, 1476/5, 1476/7, 1477/2, 1478/2, 1478/5, 1478/9, 1483/10, 1483/12, 1483/2, 1483/3, 1483/9, 1490/4, 1491/1, 1491/2, 1491/3, 1494/1, 1495/1, 1497/1, 1497/2 of Madakkathara Village, Trissur District - granted - Orders issued.

STATE ENVIRONMENTAL IMPACT ASSESSMENT AUTHORITY, KERALA

No. 991/EC1/4812/SEIAA/2015

Dated, Thiruvananthapuram 17/01/2018

Ref:

- 1. Application dated 19/11/2015 from Mr. Jose John, Managing Director of M/s Trissur Sand and Gravel Pvt Ltd., Panadipparambu, Vellanikkara.P.O., Madakkathara, Thrissur 680 651.
- 2. Minutes of the 60th meeting of SEAC, Kerala, held on 28th and 29th July, 2016.
- 3. Minutes of the 71st meeting of SEAC held on 20th and 21st April 2017.
- 4. Minutes of the 69th meeting of SEIAA held on 1st June 2017.
- 5. Minutes of the 76th meeting of SEIAA held on 16th November 2017
- 6. Minutes of the meeting of 77th SEIAA held on 28th November 2017
- 7. Affidavit received on 28/12/2017 from Mr.Jose John, Managing Partner of M/s Trissur Sand and Gravel Pvt Ltd-

ENVIRONMENTAL CLEARANCE NO. 09/2018

Sri. Jose John, Managing Director, M/s Trissur Sand and Gravel Pvt. Ltd., Panadipparambu, Vellanikkara P.O., Madakkathara, Thrissur, Kerala-680651, vide his application received on 21-11-2015, has sought Environmental Clearance under EIA Notification, 2006 for the quarry project in Survey Nos. Nos. 1476/1, 1476/10, 1476/2, 1476/4, 1476/5, 1476/7, 1477/2, 1478/2, 1478/5, 1478/9, 1483/10, 1483/12, 1483/2, 1483/3, 1483/9, 1490/4, 1491/1, 1491/2, 1491/3, 1494/1, 1495/1, 1497/1, 1497/2 for an area of 8.6589 hectares at Madakkathara Village, Thrissur Taluk, Thrissur District, Kerala. The project comes under Category B, Activity 1(a), (i) as per the Schedule of EIA Notification 2006 (since it is below 50 hectares) and as per O.M. No. L-11011/47/2011-IA.II(M) dated 18th

May 2012 of Ministry of Environment and Forests. The project is further Categorised as Category B2 as per Notification No.S.O.141 (E) dt.15.01.2016 of Ministry of Environment and Forests, since the area of the project is below 25 hectares.

Details of the project as furnished by the applicant are as follows:

BASIC INFORMATION OF QUARRY (To be filled in by the Project Proponent) PART A

		raki a	38a.,	· · · · · · · · · · · · · · · · · · ·			
		I. Project details					
1.	File No.	991/ SEIAA / EC1 / 4809 / 2015					
2.	Name /Title of the project	Environment Clearance for Building Stone Quarry project of M/s Trissur Sand & Gravel (Pvt.) Ltd. for area 8 6589 hectares.					
3.	Name and address of project proponent.	Mr. Jose John (Managing Director) M/s Trissur Sand and Gravel Pvt. Ltd., Pandiparambu, Vellanikkara P.O., Madakkathara, Thrissur, Kerala-680651.					
4.	Owner of the land	Private own land					
5.	Survey No. District/Taluk/ and Village etc.	Survey Nos. 1476/1, 1476/10, 1476/2, 1476/4, 1476/5, 1476/7, 1477/2, 1478/2, 1478/5, 1478/9, 1483/10, 1483/12, 1483/2, 1483/3, 1483/9, 1490/4, 1491/1, 1491/2, 1491/3, 1494/1, 1495/1, 1497/1, 1497/2 of Madakkathara Village, Thrissur Taluk, Thrissur District, Kerala.					
6.	Details of period of lease or permit with number including the beginning and expiry date of lease/permit	The present application area is for 8.658 The quarry is working with mine lease lease area is part of the area under condetails of mine lease is given below: Sr. Lease Proceeding Order No. No. & Date 1. 118/2008-09/4892/M3/2008	for an area of 1.37				
	period (Copy to be attached)	Dt. 22-05-2008 The copy of the mine lease is attached.	- 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1				
7.	Present Status of the project a. Date & Year of starting the work of the quarry project.	The quarry is in operation since 31-05-2008 with mine lease for an area of 1.3739 ha. which is part of the area under consideration.					
	b. whether the quarry is working at	Presently, the quarry is working with r 05-2018 for an area of 1.3739 ha. consideration.	nine lease which which is part of	is valid upto 30- the area under

	correspondence	Madakkathara, Thrissur, Kerala-680651		
	\	II. Land Details		
11.	a) Extent of area in 8.6589 ha. hectares			
	b) Is the property			
12.	forest land/Gov			
	land/own land/j land	patta		
		A total estimated quantity of 29,755 cu.m. of topsoil is proposed to		
		be removed during the mining operations. The topsoil excavated		
		from the quarry will be dumped separately at pre-determined place and subsequently will be utilized in spreading over reclaimed areas		
	**************************************	for plantation. Precautions will be taken to limit the height of the		
	c) Quantity of top	topsoil dump to 5 to 6 meters in order to preserve its fertility and		
13.	soil/öyer burde			
	produced and managed	infertility by planting fodder grass and leguminous plants during temporary storage.		
	managed			
		About 18,597 cu.m. of overburden will be generated throughout the		
		mine life. This waste will be utilized within the pit for lying of haul roads. At the end use, OB can be reutilized as soil base for		
		plantation.		
	-	Latitude (N) 10 ⁶ 34'00.71" to 10 ⁶ 34'21.52"		
14.	d) Latitude and Longitude	Longitude (E) 76° 17'04.44" to 76° 17'15.07"		
	Longitude			
4.5	e) Topography of	Part of the proposed land existing quarry and there is no vegetation		
15.	and elevation	and remaining part of the proposed land is covered with native trees, shrubs, herbs, grass, climbers, bushes etc.		
		uces, sinuos, neros, grass, cinnocis, ousnes etc.		

			The highest elevation of the lease area is 150 m MSL and lowest is 50 m MSL.
16.	f)	Slope analysis	Towards south side.
17.	g)	Will there be any significant land disturbance resulting in soil erosion, subsidence & natural drainage.	Due care will be taken to provide channel all around the foot of the hill to collect run off and also to avoid soil erosion. There is no danger of flood or inundation as the proposed working is above the normal ground level. The area is not susceptible to floods.
18.	h)	Access road to the site width and condition	7 m. wide tarred road.
19.	i)	Will there be any adverse impact on the aesthetics of the proposal site	The land used will be fully reclaimed and rehabilitated by backfilling the pits and plantation. Plantation and afforestation will add to the improvement in environment and aesthetic beauty of the area.
	•		III. Mining details
20.	a)	Minimum and Maximum height of excavation.	The exploitation of mineral is being done from 150 m MSL to 50 m. MSL in conceptual phase.
21.	b)	Life of mine proposed.	About 23 years
22.	c)	Underground mining if any proposed	Not applicable
23.	d)	Method of Mining	The working will be carried out by opencast semi-mechanized method as per the approved Mining Plan.
24.	e)	Distance from the adjacent quarry	There are seven quarries with combine area of 8.0082 ha. in operation within 500 m. radius. Five quarries of M/s Trissur Sand & Gravel (P) Ltd. (4.3936 ha.) & two quarries of M/s Mridhul Granites & Crusher P. Ltd. (3.6146 ha). In this regard cluster certificate is submitted along with the application.
25.	f)	Cluster condition if any	The copy of cluster certificate is already submitted with the Environment Clearance Application.
26.	g)	Has "No cluster" certificate" submitted?	Cluster certificate is already submitted with Environment Clearance Application.
27.	h)	Distance from nearby habitation	103 m. (east direction)
28.	i).	Distance from nearby forest, if applicable	Pattikad Forest Station – about 1 km. (NE)
29.	j)	Distance from protected area, Wildlife Sanctuary,	Peechi Wazhani Wildlife Sanctuary – about 12 km. (NE) (Application for Wildlife Clearance from NBWL at MoEF was submitted)

	National Park etc.					
30	k) Distance from nearby streams/rivers/Natio nal Highway and Roads	Water Bodies:- Peechi Irrigation drain, 500m, S Kachithodu Checkdam, 700m, NE Thanikkudam River, 2.50 km, NW Wazhani dam, 10 km, NE Highway - N.H. 47 (Salem-Kochi-Kanyakumari) – about 4 km. SE				
31	Is ESA applicable? If so distance from ESA limit	Not falling in ESA				
32	m) Has approved mining plan, prepared by RQP submitted?	Yes, the approved mining plan prepared by ROP is already submitted along with the application.				
33.	n) Capacity of production in TPA	3,00,000 MTA				
34.	o) Details of mining process	The mining will be done by open cast semi-mechanized method of mining. The bench height and width will be maintained 5 m. Excavated material is transported to the crusher unit existing within the complex for further processing. The ultimate depth of the mine workings is estimated to reach upto 50 m MSL.				
		IV. Details of Project cost				
35.	a) Land cost	Rs. 10.55 Crores (All inclusive)				
36.	b) Plant and Machinery	Rs. 10.55 Crores (All inclusive)				
37.	c) Total Cost	Rs. 10.55 Grores (Alf inclusive)				
38.	V. Financial Statement including funding source and details of insurance etc.	Project Cost Rs. 10.55 Crores Insurance # Insurance to the quarry workers would provide through				
39.	Management Plan	Air Pollution Mining activities will generate certain quantities of dust during drilling, blasting, loading and transportation operations. The following measures will be taken to mitigate the fugitive dust from different operations. Laying of haul road as per the standards, black topping of permanent haul road and service road to avoid or eliminate air – borne dust. To avoid the dust generation from the drilling operations, wet drilling method will be adopted. Drill machines will be equipped with dust collectors.				

Water Pollution	 Use of appropriate explosives for blasting and avoiding overcharging of blast holes. Controlled blasting techniques will be adopted. Watering of haul road and other road at regular intervals. Provision of dust filters/ mask to workers working at highly dust prone and affected areas. Provision of green belt all along the periphery of the lease area. Periodical monitoring of ambient air quality in and around the lease area. The extracted mineral will be transported from the quarry to the end user by adopting following measures so as to minimize dust emissions. In case of long transportation the trucks after loading will be covered with tarpaulin sheets. Speed of the vehicles will be maintained within the prescribed limits. Trucks will not be over loaded and will be maintained to the body leve! Provision of storm water collection pond with an appropriate capacity. The water requirement for sprinkling on sources of dust emission, on roads, landscaping etc. Can be met from the stored rainwater in the pond/tank. The major noise generating source from the proposed activity is working machinery, drilling, blasting and plying of vehicles. The following control measures are to be undertaken to bring down the noise levels:- Proper maintenance of machinery, equipments and improvement on design of machines. Use of personal protective devices i.e., earmuffs and earplugs by workers, who are
Noise	The major noise generating source from the proposed activity is working machinery, drilling, blasting and plying of vehicles. The following
	 Proper maintenance of machinery, equipments and improvement on design of machines. Use of personal protective devices i.e., earmuffs and earplugs by workers, who are working in high noise generating areas. Creation of wide green belt of dense foliage
	 between mine areas and residential colonies. Proper training to personnel to create awareness about adverse noise level effects. Planned noise monitoring at suitable locations in the plant and outside location for proper effective remedial actions.
Solid Waste Management	Topsoil Management The topsoil excavated from the quarry will be

		dumped / stacked separately at pre-determined place and subsequently will be utilized in spreading over reclaimed areas for plantation as part of eco-restoration. Precautions will be taken to limit the height of the topsoil dump / stacked to 5 to 6 meters in order to preserve its fertility and shelf life. It will be suitably protected from soil erosion and infertility by planting fodder grass and leguminous plants during temporary storage. Overburden Management This waste will be utilized within the pit for lying of haul roads. At the end use, QB can be reutilized as soil base for plantation. Eco- restoration The year wise programme of eco-restoration for life of mine will be made and about 8,600
	VI. Whether	trees will be planted in an area of 8.5419 ha.
40.	Environment	Yes,
41.	VII. Does it suggest mitigation measures for each activity	Detailed Environment Management Plan is already submitted with E.C. Application.
42.	VIII. If Pre-Feasibility Report (PFR) satisfactory	Detailed Environment Management Plan is already submitted with E.C. Application.
43.	IX. Does it need public hearing	Not Applicable
44.	X. Details of litigation and Court verdict if any	No litigation pending.
45.	XI. Details of public complaint, if any	None
46.	XII. Details of statutory sanction required	The following statutory sanction required: > Consents from the Kerala State Pollution Control Board. > Permission from Mining & Geology Department. > Permission from Explosive Department > Permission from Panchayat Office
47.	XIII. If CRZ recommendation applicable?	Not Applicable
		PART B
	Environme	ent Impact Assessment and Mitigation Measures
	·	Impact on water

48.	a)	Details of water requirement per day in KLD	The total water requirement is about 16 KLD.
49.	b)	Water source/sources.	The total water requirement is about 16 KLD in which 2 KLD is for domestic which would be sourced from open well, 12 KLD for dust suppression system in mine as well as ancillary unit and 2 KLD for plantation purposes and will be sourced from storm water pond/tank.
50.	c)	Expected water use per day in KLD.	16 KLD.
51.	d)	Details of water requirements met from water harvesting.	12 KLD for dust suppression system in mine as well as ancillary unit and 2 KLD for plantation purposes and will be sourced from storm water pond/tank.
52.	e)	What are the impact of the proposal on the ground water?	No significant impact envisaged on ground water due to the mining project.
53.	f)	How much of the water requirement can be met from the recycling of treated waste water? (Facilities for liquid waste treatment)	No.
54.	g)	What is the incremental pollution load from waste water generated from the proposed activities?	The sewage to a tune of 1.6 KLD generated from the mine office will be diverted to the septic tank followed by soak pit.
55.	h)	How is the storm water from within the site managed?	 Storm water drains with silt traps will be suitably constructed all along the periphery of the pit area to collect the run-off from the lease area and divert into the storm water pond/tanks proposed within the complex. All measures will be taken not to disturb the existing drainage pattern adjacent to the other property. De-siltation traps and storm water collection pond proposed for silt removal. The storm water collected from the lease area will be utilized for dust suppression on haul roads, plantation within the premises etc.
			ersity and Eco restoration Programmes
56.	a)	Will the project involve extensive clearing or modification of vegetation (Provide details)	Due to the mining activities, there will be loss of some native species and vegetation. However, some of these species will be planted at the end use for eco-restoration.
57.	b)	What are the measures proposed to minimize the likely impact on vegetation (details of proposal for tree plantation/landscaping)	The year wise programme of eco-restoration for the life of mine will be made and about 8,600 trees will be planted in an area of 8.5419 ha. Ecological restoration for the mined area by plantation of the species as per the time schedule suggested below: - First Six months Herbs & grass

				Next Six months Shrubs Next Six months onwards Trees Selection of species is based on High Dust Capturing, Soil Holding Capacity, ground water recharge capacity etc. More focus is given for medicinal plants.
58.	c) Is there any displacement of fauna – both terrestrial and aquatic. – If so what are the mitigation measures? d) Presence of any endangered species or red listed category (in detail)		errestrial so what	No
			or red	No endangered species found at site
			Im	pact on Air Environment
59.	a)	What are the mitiga measures on genera dust, smoke and air	tion of	Details already provided at EMP section at Sr. No. 39 above.
60.	la Dataila Cintana 140 CC		2000	Designated space will be provided for parking of truck/tipper within the site. For the purposes of mining activities, existing roads are sufficient. However, haul road will be suitably developed within the proposed area. Speed of the vehicles will be maintained within the prescribed limits (Speed Governor fitted).
61.	c) Details of noise from traffic, machines and vibrator and mitigation measures		ıd	Details already provided at EMP section at Sr. No. 39 above
62.	project site and mitigation		n noise mbient ne	Details already provided at EMP section at Sr. No. 39 above
63.	e)	Air quality monitor detail	ing ih	Details already provided at EMP section at Sr. No. 39 above.
				Energy Conservation
64.	a) Details of power requirement and source of supply.		urce of	The total power requirement will be 75 kW, which will be drawn from diesel engine.
65.	b) Details of renewable energy (non – conventional) used.			We will promote renewable energy resources.
,				Risk Management
66.				l Environment Management Plan is already submitted with plication.

		proposed for risk hazards in case of emergency such as accident at the				
	b)	Are proposals for fencing around the quarry satisfactory?				e all around the quarry site.
67.	c)	Storage of explosives/hazard ous substance in detail	for min charge hazards will be	ing the mine of holes will are envisage handled with	eral. Howev ll be carried ed due to m utmost care	It in increase in frequency of blasting er, controlled blasting with optimum d out to loosen the rock. Explosion hishandling of explosives. Explosives in compliance of conditions imposed to & Metalliferous Mines Regulation,
	d)	Facility for solid waste management	separate		rked place	erated from the site will be stored and will be used for eco-restoration
				Socio Econoi	mic Impacts	5
68.	1)	Will the project cause adverse effects on local communities disturbance to sacred sites or other cultural values. What are the safe guards proposed?	No			
69.	2)**	Will the proposal result in any changes to the demographic structure of local population. If so, provide details.	providing in and	ng employme around the	nt opportun area there	etly / indirectly develop the area by ities. With the proposed development will be many supporting facilities/ to the development of the area.
70.	3)	Are the CSR proposals satisfactory. Give	need ba		roposed CSI

- 2. The proposal was considered in the 60th meeting of SEAC, Kerala, held on 28th and 29th July, 2016. The committee appraised the proposal based on the mining plan, pre-feasibility report and all other documents submitted along with the Form I application. The Committee decided to defer the item for field visit the following clarifications are need to be checked during site visit.
 - 1. Dam in the upstream side should be checked.
 - 2. Documents pertaining to the public complaints to be submitted by the proponent.
 - 3. Proximity to KSEB substation

Accordingly, the Subcommittee Members Dr. Jayson EA and Dr. Padmakumar of SEAC carried out site inspection and submitted the report.

- 3. The proposal was considered in the 71st meeting of SEAC held on 20th and 21st April 2017. The Committee appraised the proposal based on Form I, Pre-feasibility Report, Mining Plan, field inspection report of the Sub Committee and all other documents submitted with the proposal. The quarry was not working at the time of field inspection. The Committee decided to Recommend for issuance of EC subject to general conditions in addition to the following specific condition.
 - 1. If any plant species endemic to Western Ghats are noticed in the area they shall be properly protected in situ or by transplanting to an appropriate location inside the lease area.

A commitment may be obtained from the proponent to set apart Rs.10 lakh (non-recurring) and Rs.10 lakh per annum (recurring) for CSR activities for the welfare of the local community in consultation with the local Panchayat.

The proponent informed through the basic details submitted on 22/05/2017 that the quarry is working with mine lease for an area of 1.3739 ha. The mine lease area is part of the area under consideration in the application. Presently, the quarry is working with mine lease which is valid upto 30-05-2018.

4. The proposal was placed in the 69th meeting of SEIAA held on 1st June 2017. The Authority accepted the recommendation of SEAC in its 71st meeting held on 20th and 21st April 2017 and decided to issue Environmental Clearance subject to obtaining legal opinion as decided in the 66th SEIAA meeting whether quarrying on lease areas without Environmental Clearance would also come under the scope of violation. EC will be issued subject to general conditions in addition to the following specific condition for mining.

1. If any plant species endemic to Western Ghats are noticed in the area they shall be properly protected in situ or by transplanting to an appropriate location inside the lease area.

The conditions suggested by the inspection report should also be fulfilled. The premining conditions should be fulfilled before the mining is started. The CSR component (Non Recurring & Recurring) should not be less than 2% of total project cost, the details of which should be submitted before the issue of EC. An affidavit that all the above conditions shall be fulfilled, should also be submitted.

- In the light of the legal opinion, the 76th meeting of SEIAA held on 16th November 2017 decided to issue EC for the proposal. As decided in the 77th meeting of SEIAA, the proponent vide ref 7th cited has submitted affidavit agreeing to spend Rs.10 lakh (Recurring) and 10 Lakh (Non-recurring), as suggested by SEAC, for the welfare of local community in consultation with local panchayath.
- Environmental clearance as per the EIA notification 2006 is hereby accorded for the 6. proposed stone quarry project of Mr.Jose John, Managing Director of M/s.Trissur Sand and Gravel Pvt Ltd, Panadipparambu, Vellanikkara P.O., Madakkathara, Thrissur of in Sy. Nos. 1476/1, 1476/10, 1476/2, 1476/4, 1476/5, 1476/7, 1477/2, 1478/2, 1478/5, 1478/9, 1483/10, 1483/12, 1483/2, 1483/3, 1483/9, 1490/4, 1491/1, 1491/2, 1491/3, 1494/1, 1495/1, 1497/1, 1497/2 of Madakkathara Village, Thrissur District, Kerala for an area of 8 6589 hectares subject to the specific conditions as recommended by SEIAA in para, 4 above, all the environmental impact mitigation and management measures undertaken by the project proponent in the all the environmental impact mitigation and management measures undertaken by the project preponent in the Form I, EMP, PFR and Mining plan submitted to SEIAA. The assurances and clarifications given by the proponent will be deemed to be a part of these proceedings as if incorporated herein. Also the general conditions for projects stipulated for mining (items 1 to 61), appended hereto will be applicable and have to be strictly adhered to.
- 7. The clearance issued will also be subject to full and effective implementation of all the undertakings given in the application form, mitigation measures as assured in the Environment Management Plan and the mining features including progressive mine closure plan as submitted with the application and relied on for grant of this clearance. The above undertakings and the conditions and the undertakings in Chapter4 (Mining), Chapter 5 (Blasting), Chapter 12 (Progressive Mine Closure Plan) of the Mining Plan as submitted will be deemed to be part of this proceedings as conditions as undertaken by the proponent, as if incorporated herein.

- 8. Validity of the Environmental Clearance will be five years from the date of this clearance, subject to inspection by SEIAA on annual basis and compliance of the conditions, subject to earlier review of E.C in case of violation or non-compliance of conditions or genuine complaints from residents within the security area of the quarry.
- 9. Compliance of the conditions herein will be monitored by the State Environment Impact Assessment Authority or its authorised offices and also by the regional office of the Ministry of Environment & Forests, Govt. of India, Bangalore.
 - i. Necessary assistance for entry and inspection should be provided by the project proponent and those who are engaged or entrusted by him to the staff for inspection or monitoring.
 - ii. Instances of violation if any shall be reported to the District Collector, Thrissur to take legal action under the Environment (Protection) Act 1986.
 - iii. The given address for correspondence with the authorised signatory of the project is Mr.Jose John, Managing Director., M/s Trissur Sand and Gravel Pvt Ltd, Panadipparambu, Vellanikkara P.O., Madakkathara, Trissur 680 651.

Sd/-P.H.Kurian I.A.S, Member Secretary (SEIAA)

To,

Mr.Jose John (Managing Director).,
M/s Trissur Sand and Gravel Pvt Ltd,

Administrator (SEIAA)

STATE ENVIRONMENT IMPACT ASSESSMENT AUTHORITY KERALA

GENERAL CONDITIONS (for mining projects)

- 1. Rain Water Harvesting facility should be installed as per the prevailing provisions of KMBR / KPBR, unless otherwise specified.
- 2. Environment Monitoring Cell as agreed under the affidavit filed by the proponent should be formed and made functional.
- 3. Suitable avenue trees should be planted along either side of the tarred road and open parking areas, if any, including of approach road and internal roads.
- 4. Maximum possible solar energy generation and utilization shall be ensured as an essential part of the project.
- 5. Sprinklers shall be installed and used in the project site to contain dust emissions.
- 6. Eco-restoration including the mine closure plan shall be done at the own cost of the project proponent.
- 7. At least 10 percent out of the total excavated pit area should be retained as water storage areas and the remaining area should be reclaimed with stacked dumping and overburden and planted with indigenous plant species that are eco-friendly, if no other specific condition on reclamation of pit is stipulated in the E.C.
- 8. Corporate Social Responsibility (CSR) agreed upon by the proponent should be implemented
- 9. The lease area shall be fenced off with barbed wires to a minimum height of 4ft around, before starting of mining. All the boundary indicators (boards, stores, markings, etc) shall be protected at all times and shall be conspicuous.
- Warning alarms indicating the time of blasting (to be done at specific timings) has to be arranged as per stipulations of Explosive Department.
- 11. Control measures on noise and vibration prescribed by KSPCB should be implemented.
- 12. Quarrying activities should be limited to day time as per KSPCB guidelines/specific conditions.
- Blasting should be done in a controlled manner as specified by the regulations of Explosives Department or any other concerned agency.
- 14. A licensed person should supervise/ control the blasting operations.
- 15. Access roads to the quarry shall be tarred to contain dust emissions that may arise during transportation of materials.
- 16. Overburden materials should be managed within the site and used for reclamation of mine pit as per mine closure plan / specific conditions.
- 17. Height of benches should not exceed 5 m, and width should not be less than 5 m, if there is no mention is the mining plan/specific condition.
- 18. Mats to reduce fly rock blast to a maximum of 10 PPV should be provided.
- 19. Maximum depth of mining from general ground level at site shall not exceed 10m
- 20. No mining operations should be carried out at places having a slope greater than 45°.
- Acoustic enclosures should have been provided to reduce sound amplifications in addition to the provisions of green belt and hollow brick envelop for crushers so that the noise level is kept within prescribed standards given by CPCB/KSPCB.
- 22. The workers on the site should be provided with the required protective equipment such as ear muffs, helmet, etc.
- 23. Garland drains with clarifiers to be provided in the lower slopes around the core area to channelize storm water.
- 24. The transportation of minerals should be done in covered trucks to contain dust emissions.
- 25. The proponent should plant trees at least 5 times of the loss that has been occurred while clearing the land for the project.
- 26. Disposal of spent oil from diesel engines should be as specified under relevant Rules/ Regulations.
- Explosives should be stored in magazines in isolated place specified and approved by the Explosives Department.
- A minimum buffer distance of 100m from the boundary of the quarry to the nearest dwelling unit or other structures, not being any facility for mining shall be provided.
- 29. 100 m buffer distance should be maintained from forest boundaries.

- 30. Consent from Kerala State Pollution Control Board under Water and Air Act(s) should be obtained before initiating mining activity.
- 31. All other statutory clearances should be obtained, as applicable, by project proponents from the respective competent authorities including that for blasting and storage of explosives.
- 32. In the case of any change(s) in the scope of the project, extent quantity, process of mining technology involved or in any way affecting the environmental parameters/impacts as assessed, based on which only the E.C is issued, the project would require a fresh appraisal by this Authority, for which the proponentshall apply and get the approval of this Authority.
- 33. The Authority reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the environment clearance under the provisions of the Environment (Protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.
- 34. The stipulations by Statutory Authorities under different Acts and Notifications should be complied with, including the provisions of Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and control of Pollution) act 1981, the Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and EIA Notification, 2006.
- The project proponent should advertise in at least two local newspapers widely circulated in the region, one of which (both the advertisement and the newspaper) shall be in the vernacular language informing that the project has been accorded Environmental Clearance and copies of clearance letters are available with the State Environment Impact Assessment Authority (SEIAA) office and may also be seen on the website of the Authority at www.seiaakerala.org. The advertisement should be made within 10 days from the date of receipt of the Clearance letter and a copy of the same signed in all pages should be forwarded to the office of this Authority as confirmation.
- A copy of the clearance letter shall be sent by the proponent to concerned Grama Panchayat/ District Panchayat/ Municipality/Corporation/Urban Local Body and also to the Local NGO, if any, from whom suggestions / representations, if any, were received while processing the proposal. The Environmental Clearance shall also be put on the website of the company by the proponent.
- The proponent shall submit half yearly reports on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) and upload the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the respective Regional Office of MoEF, Govt. of India and also to the State Environment Impact Assessment Authority (SEIAA) office.
- 38. The details of Environmental Clearance should be prominently displayed in a metallic board of 3 ft x 3 ft with green background and yellow letters of Times New Roman font of size of not less than 40. Sign board with extent of lease area and boundaries shall be depicted at the entrance of the quarry, visible to the public
- 39. The proponent should provide notarized affidavit (indicating the number and date of Environmental Clearance proceedings) that all the conditions stipulated in the EC shall be scrupulously followed.
- 40. No change in mining technology and scope of working should be made without prior approval of the SEIAA, No further expansion or modifications in the mine shall be carried out without prior approval of the SEIAA, as applicable.
- 41. The Project proponent shall ensure that no natural water course and/or water resources shall be obstructed due to any mining operations. Necessary safeguard measures to protect the first order streams, if any, originating from the mine lease shall be taken.
- 42. Monitoring of Ambient Air Quality to be carried out based on the Notification 2009, as amended from time to time by the Central Pollution Control Board. Water sprinkling should be increased at places loading and unloading points & transfer point to reduce fugitive emissions.
- 43. The top soil, if any, shall temporarily be stored at earmarked site(s) only for the topsoil shall be used for land reclamation and plantation. The over burden (OB) generated during the mining operations shall be stacked at earmarked dump site(s) only. The maximum height of the dumps shall not exceed 8m and width 20m and overall slope of the dumps shall be maintained to 45°. The OB dumps should be scientifically vegetated with suitable native species to prevent erosion and surface run off. In critical areas, use of geo textiles shall be undertaken for stabilization of the dump. The entire excavated area shall be backfilled. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self-sustaining.

- 44. Catch drains and siltation ponds of appropriate size shall be constructed around the mine working, mineral and OB dumps to prevent run off of water and flow of sediments directly into the river and other water bodies. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains shall be regularly desilted particularly after monsoon and maintained properly.
- 45. Effective safeguard measures such as regular water sprinkling shall be carried out in critical areas prone to air pollution and having high levels of PM₁₀ and PM_{2.5} such as haul Road, loading and unloading points and transfer points it shall be ensured that the Ambient Air Quality parameters conform to the norms prescribed by the Central Pollution Control Board in this regard.
- 46. Fugitive dust emissions from all the sources should be controlled regularly. Water spraying arrangement on haul roads, loading and unloading and at transfer points should be provided and properly maintained.
- 47. Measures should be taken for control of noise levels below 85 dBA in the work environment.
- 48. A separate environmental management cell with suitable qualified personnel should be set-up under the control of a Senior Executive, who will report directly to the Head of the Organization.
- 49. The funds earmarked for environmental protection measures and CSR activate should be kept in separate account and should not be diverted for other purpose. Year wise expenditure should be reported to the State Environment Impact Assessment Authority (SEIAA) office.
- 50. The Regional Office of MOEF & CC located at Bangalore shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (S) of the Regional Office by furnishing the requisite data/information/monitoring reports.
- 51. Any appeal against this Environmental Clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
- 52. Concealing the factual data or submission of false/fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
- 53. The SEIAA may revoke or suspend the order, for non implementation of any of the specific or thisimplementation of any of the above conditions is not satisfactory. The SEIAA reserves the right to alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
- 54. The above conditions shall prevail notwithstanding anything to the contrary, in consistent, or simplified, contained in any other permit, license on consent given by any other authority for the same project.
- 55. This order is valid for a period of 5 years or the expiry date of mine lease period issued by the Government of Kerala, whichever is earlier.
- The Environmental Clearance will be subject to the final order of the courts in any pending litigation related to the land or project, in any court of law.
- The mining operation shall be restricted to above ground water table and it should not intersect ground water table.
- All vehicles used for transportation and within the mines shall have 'PUC' certificate from authorized pollution taking centre. Washing of all vehicles shall be inside the lease area'
- 59. Project proponent should obtain necessary prior permission of the competent authorities for drawal of requisite quantity of surface water and ground water for the project.
- 60. Regular monitoring of flow rates and water quality upstream and downstream of the springs and perennial nallahs flowing in and around the mine lease area shall be carried out and reported in the six monthly reports to SEIAA.
- 61. Occupational health surveillance program of the workers should be under taken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed.

For Member Secretary, SEIAA Kerala
