

## Proceedings of the State Environment Impact Assessment Authority Kerala

Present: Prof. (Dr.) K.P. Joy, Chairman; Dr. J. Subhashini, Member and Sri, James Varghese, I.A.S., Member Secretary.

Sub: SEIAA- Environmental clearance for the quarry project in Sy. No. 10/7, 11/5, 11/7, 11/8, 11/9, 13/1, 14/1-1, 14/1-2, 15/1, 15/1-1, 15/1-2-1, 15/1-3, 15/1-4, & 15/2 of Ezhumatoor Village, Block no 27, Mallappally Taluk, Pathanamthitta District, for an area of 4.67.11 hectares - EC granted - Orders issued.

# STATE ENVIRONMENTAL IMPACT ASSESSMENT AUTHORITY, KERALA

### No.852/SEIAA/EC4/2968/2015

Dated, Thiruvananthapuram 17/08/2017

Ref:

- Application dated 28/07/2015 by Sri. M.V. Abraham, Pulimpalil House, 1. Niranam P.O, Kadpra, Thiruvalla, Pathanamthitta District

- Minutes of the 61<sup>st</sup> meeting of SEIAA, held on 30<sup>th</sup> November 2016.
- 10. Minutes of 67<sup>th</sup> meeting of SEIAA held on 28/4/2017.
- Affidavit dated 19/5/2017 from Shri.M.V.Abraham

# **ENVIRONMENTAL CLEARANCE NO.60/2017**

Sri. M.V. Abraham, Pulimpalil House, Niranam P.O, Kadapra, Thiruvalla, Pathanamthitta, vide his application received on 28-07-2015 has sought Environmental Clearance under EIA Notification, 2006 for the expansion of Building Stone quarry project in Sy. Nos.10/7, 11/5, 11/7, 11/8, 11/9, 13/1, 14/1-1, 14/1-2, 15/1, 15/1-1, 15/1-2-1, 15/1-3, 15/1-4, & 15/2 of Ezhumatoor Village, Block no 27, Mallappally Taluk, Pathanamthiaa District, for an area of 4.67.11 hectares. The project comes under Category B, Activity 1(a), (i) as per the Schedule of EIA Notification 2006 (since it is below 50hectares) and as per O.M. No. L-11011/47/2011-IA.II (M) dated 18th May 2012 of Ministry of Environment and Forests. It is further categorized as Category B2 as per the O.M. No. J-13012/12/2013-IA-II (I) dated 24.12.2013 of Ministry of Environment and Forests, since the area of the project is below 25 hectares.

Details of the project as furnished by the applicant are as follows:

# BASIC INFORMATION OF QUARRY PROJECT PART A

	I. Project details				
1.	File No.	852/SEIAA/EC4/2968/2015			
2.	Name /Title of the project	Masonry Stone Mine ( Quarry ) project of  Mr. M V Abraham			
3.	Name and address of project proponent.	Mr. M V Abraham Pulimpallil, Niranam(PO), Kadapara Thiruvalla, Pathanamthitta Kerala-689 621			
4.	Owner of the land	Mr. M V Abraham			
5.	Survey No. District/Taluk/ and Village etc.	Survey No. 10/7,11/5, 11/7, 11/8, 11/9, 13/1, 14/1-1, 14/1-2, 15/1, 15/1-1, 15/1-2-1, 15/1-3, 15/1-4 & 15/2, Ezhumattoor Village, Mallapally Taluk, Pathanamthitta District, Kerala for an area of 4.67.11 ha.			
6.	Details of period of lease or permit with number including the and expiry of lease/permit (Copy to be attached)	The quarry was working with quarrying short term permit for an area of 1.4518 ha. at the time of submission of application. This permit was expired on 09/02/2015. Another short term permit for an area of 0.9976 ha. was accorded vide Order No. 13/2016-17/MM/GBS/QP/1170/DOPTA/M/16 dt. 04/07/2016 and it was also expired on 31/12/2016.  The copy of the short term permit is attached with this proforma.			
7.	Present Status of the project  a. Date & Year of starting the work of the quarry	Quarry is not working 04/07/2014			

	project.		
	b. whether the	o .	
	c. If stopped working since when?	9/12/2016	
8.	Date of submission of Application	8/07/2015	
9.	Brief description of the project.  The land for the proposed quarry is Private land and the land is possessed in the name of Mr. M. V. ABRAHAM. The targeted production of mine will be 29469m³. The estimated project cost is be Rs. 69.24 Lakhs. The expected life of mine estimated will be 5 years.  The working will be carried out by opencast semi-mechanized method as per the approved Mining Plan.		
10.	Details of Authorized Signatory and address for correspondence  Mr. M V Abraham Pulimpallil, Niranam(PO), Kadapara Thiruvalla, Pathanamthitta Kerala-689 621  II. Land Details		
11.	a) Extent of area in	4.67.11 ha.	
12.	hectares b) Is the property forest land/Govt. land/ own land /patta land	Private Own Land	
13.	c) Quantity of top soil/over burden produced and managed	It is estimated that around 22374 ca. m. of top soil will be generated from the proposed pit, which will be properly stacked and will be utilized for plantation over the reclaimed areas. Also it is estimated that around 1,988 cu. m. of OB is generated throughout the mine life.  A total estimated quantity of 22374 cu. m. of topsoil is proposed to	
		1. www communica quantity of 225/4 cu. iii. of topooff to proposed to	

		be removed during the mining operations. The topsoil excavated from the quarry will be dumped separately at pre-determined place and subsequently will be utilized in spreading over reclaimed areas for plantation. Precautions will be taken to limit the height of the topsoil dump to 5 to 6 meters in order to preserve its fertility and shelf life. It will be suitably protected from soil erosion and infertility by planting fodder grass and leguminous plants during temporary storage.		
14.	d) Latitude and Longitude	Latitude (N) 09°25'57.54 70"N to 09°26'7.5401"N  Longitude (E) 76°41'54.0910"E-76°42'3.7871"E		
15.	e) Topography of land and elevation	Part of the proposed land is exposed rock and the remaining land is covered with native trees, shrubs, herbs, grass, climbers, bushes etc. The topography of the lease area is hilly. The highest elevation of the lease area is 109 m MSL and lowest is 89 m MSL. As the proposed area is hill rock, the drainage of the lease area is towards South.		
16.	f) Slope analysis	The drainage of the lease area is towards South.		
17.	g) Will there be any significant land disturbance resulting in soil erosion, subsidence & hatural drainage	Zone-III, Moderate damage risk zone as par BMTPC, Vulnerability atlas Seismic zone of India IS: 1893-2002.		
18.	h) Access road to the site width and condition	7m tarred road		
19.	i) Will there be any adverse impact on the aesthetics of the proposal site	adverse impact on the aesthetics of the proposal No, the land used will be fully reclaimed and rehabilitated by backfilling the pond and plantation. Plantation and afforestation will add to the improvement in environment and aesthetic beauty of the		
	III. Mining details			
20.	a) Minimum and Maximum height of excavation.	The exploitation of mineral is being done from 109 m MSL to 89m MSL in conceptual phase		
21.	b) Life of mine proposed.	5 years		
22.	c) Underground mining if any proposed	The working will be carried out by opencast semi-mechanized method as per the approved Mining Plan.		

23.	d)	Method of Mining	The working will be carried out by opencast semi-mechanized method as per the approved Mining Plan	
24.	e)	Distance from the adjacent quarry	There is no working quarry within 500m radius	
25.	f)	Cluster condition if any		
26.	g)	Has "No cluster certificate" submitted?	Yes, cluster certificate is already submitted with Environment Clearance Application.	
27.	h)	Distance from nearby habitation	The nearest habitation is about 100m towards East side	
28.	i)	Distance from nearby forest, if applicable	None within 15 km radius.	
29.	j)	Distance from protected area, Wildlife Sanctuary, National Park etc.	None within 15 km radius.	
30.	k)	Distance from nearby streams/rivers/N ational Highway and Roads	Manimala River 1.53 Km, N  Not falling in ESA	
31.	1)	Is ESA applicable? If so distance from ESA limit		
32.		Has approved mining plan, prepared by RQP submitted?	Yes, the approved mining plan prepared by RQP is already submitted with E.C. Application.	
33.	n)	Capacity of production in TPA	29469m <sup>2</sup> per annum	
34.	0)	Details of mining process	The mining will be done by open cast semi-mechanized method of mining. The bench height and width will be maintained 5 m. Excavated material is transported to the crusher unit existing near the complex for further processing. The ultimate depth of the mine workings is estimated to reach upto 32m MSL	
			IV. Details of Project cost	
35.	a)	Land cost	Rs.69.24 Lakhs ( All inclusive)	

36.	b) Plant and Machinery	Rs.69.24 Lakhs ( All inclusive)	
37.	c) Total Cost	Rs.69.24 Lakhs ( All inclusive)	
38.	V. Financial Statement including funding sourceand details of insurance etc.	Project Cost = Rs. 69.24 Lakhs  Insurance = Insurance to the quarry workers would provide through insurance company.  Funding = Own source	
39.	Management Plan	Air Pollution  Mining activities will generate certain quantities of dust during drilling, blasting, loading and transportation operations. The following measures will be taken to mitigate the fugitive dust from different operations.  Laying of haul road as per the standards, black topping of permanent haul road and service road to avoid or eliminate air – borne dust.  To avoid the dust generation from the drilling operations, wet drilling method will be adopted.  Drill machines will be equipped with dust collectors.  Use of appropriate explosives for blasting and avoiding overcharging of blast holes.  Controlled blasting techniques will be adopted.  Watering of haul road and other road at regular intervals.  Provision of dust filters/ mask to workers working at highly dust prone and affected areas.  Provision of green belt all along the periphery of the lease area.  Periodical monitoring of ambient air quality in and around the lease area.  The extracted mineral will be transported from the quarry to the end user by adopting following measures so as to minimize dust emissions.  In case of long transportation the trucks after loading will be covered with tarpaulin sheets.  Speed of the vehicles will be maintained within the prescribed limits.	

41.	VII. Does it suggest mitigation measures for each activity	Detailed Environment Management Plan is already submitted with E.C. Application.				
42.	VIII. If Pre- Feasibility Report (PFR) satisfactory	Detailed Pre-Feasibility Report (PFR) is already submitted with E.C. Application.				
43.	IX. Does it need public hearing	Not Applicable				
44.	X. Details of litigation and Court verdict if any	No litigation pending				
45.	XI. Details of public complaint, if any	None				
		The following Govt. Orders Policies are to be followed:-				
46.	XII. Details of statutory sanction required	<ul> <li>Kerala Minor Mineral Concession Rules, 2015.</li> <li>Mines Act, 1952</li> <li>Explosive Rules, 2008</li> <li>Kerala Panchayat Raj Act, 1994</li> <li>Environment Protection Act, 1986</li> <li>EIA Notification, 2006 / 2009</li> <li>The Kerala Promotion of Tree Growth in Non-Forest Areas (Amendment) Act, 2007.</li> </ul>				
47:	XIII.If CRZ recommendation applicable?	Not Applicable				
!		PART B				
	Environm	ent Impact Assessment and Mitigation Measures				
Impact on water						
*	The total water requirement is about 17.0 KLD in which 1 KLD is					
.	a) Details of water	for domestic which would be sourced from open well, 4 KLD for				
48.	requirement per day in KLD	dust suppression system in mine and for plantation purposes will be sourced from storm water pond.				
49.	b) Water	The total water requirement is about 17.0 KLD in which 1 KLD is				
47.	source/sources.	for domestic which would be sourced from open well, 4 KLD for				

		dust suppression system in mine and for plantation purposes will be sourced from storm water pond.		
50	c) Expected water use per day in KLD.	5 KLD		
51	d) Details of water requirements met from water harvesting.	4 KLD for dust suppression system in mine and for plantation purposes will be sourced from storm water pond.		
52	e) What are the impact of the proposal on the ground water?	No significant impact envisaged on ground water due to the mining project.		
53.	f) How much of the water requirement can be met from the recycling of treated waste water?	No STP proposed for treatment of waste water.		
	(Facilities for liquid waste treatment)			
54.	water generated from the	The sewage to a tune of 0.80 KLD generated from the mine office will be diverted to the septic tank followed by soak pit.		
	proposed activities?	The run-off from the lease area will be suitably collected through		
55.	h) How is the storm channels and will be stored in storm water pond for the water from the will retion in Mine/ Crusher units. However, all massures we			
	Impact on Biodiversity and Eco restoration Programmes			
56.	a) Will the project involve extensive clearing or modification of vegetation (Provide details)	Due to the mining activities, there will be loss of some native species and vegetation. However, some of these species will be planted at the end use for eco-restoration.		
57.	The year wise programme of eco-restoration for life of mine will be measures			

	proposed to minimize the likely impact on vegetation (details of proposal for tree plantation/ landscaping)	made and about 4,600 trees will be planted in an area of 4.6711 ha.	
58.	c) Is there any displacement of fauna – both terrestrial and aquatic. – If so what are the mitigation measures? d) Presence of any endangered species or red listed category (in detail)	Not applicable  No endangered species found at site	
		Impact on Air Environment	
59.	dust, smoke and air quality  • Use of appropriate explosives for blasting and avoiding overcharging of blast holes.  • Controlled blasting techniques will be adopted.  • Watering of haul road and other road at regular intervals.  • Provision of dust filters/ mask to workers working at highly due prone and affected areas.  • Provision of green belt all along the periphery of the lease area.  • Periodical monitoring of ambient air quality in and around the lease area.		
60.	b) Details of internal traffic management of the site.	The extracted mineral will be transported from the quarry to the end user by adopting following measures so as to minimize dust emissions.	

<ul> <li>In case of long transportation the trucks after loading will covered with tarpaulin sheets.</li> <li>Speed of the vehicles will be maintained within the prescrib limits.</li> <li>Trucks will not be over loaded and will be maintained to the body level.</li> <li>The major noise generating source from the proposed activity</li> </ul>			
	working machinery, drilling, blasting and plying of vehicles. The		
following control measures are to be undertaken to bring downoise levels:  Proper maintenance of machinery, equipments and improve on design of machines.  Use of personal protective devices i.e., earmuffs and earphy workers, who are working in high noise generating areas.  Creation of wide green belt of dense foliage between mine and residential colonies.  Proper training to personnel to create awareness about an noise level effects  Planned noise monitoring at suitable locations in the plan outside location for proper effective remedial actions.			
d) Impact of DG sets and other equipments on noise and	No DG Set proposed		
ambient air quality around the project site and mitigation			
e) Air quality monitoring in detail	The ambient air quality monitoring of the project site was carried out and the copy of report is already submitted with E.C. Application.		
Energy Conservation			
a) Details of power requirement and source of supply.	The total power requirement will be 75 kW, which will be drawn from diesel engine. Fuel Quantity – 16 to 20 lt/hr.		
b) Details of renewable energy (non – conventional) used.	The total power requirement will be 75 kW, which will be drawn from diesel engine. Fuel Quantity – 16 to 20 lt/ hr.		
	from traffic, machines and vibrator and mitigation measures  d) Impact of DG sets and other equipments on noise and vibration and ambient air quality around the project site and mitigation measures  e) Air quality monitoring in detail  a) Details of power requirement and source of supply. b) Details of renewable energy (non— conventional)		

Risk Management				
Nisk Management				
66.	a) Are there sufficient measures proposed for risk hazards in case of emergency such as accident at the site?	Detailed Environment Management Plan is already submitted with E.C. Application.		
	Are proposals for	Barbed wire fencing will be done all around the quarry site.		
67.	b) Storage of explosives/hazar dous substance in detail.	The stone quarry mine will result in increase in frequency of blasting for mining the mineral. However, controlled blasting with optimum charge of holes will be carried out to loosen the rock. Explosion hazards are envisaged due to mishandling of explosives. Explosives will be handled with utmost care in compliance of conditions imposed by Chief Controller of Explosive & Metalliferous Mines Regulation, 1961.		
	c) Facility for solid waste management	Top soil and over burden generated from the site will be stored separately on earmarked place and will be used for eco-restoration and internal road development.  Socio Economic Impacts		
68.	a) Will the project cause adverse effects on local communities disturbance to sacred sites or other cultural values. What are the safe guards proposed?	The proposed project will directly / indirectly develop the area by providing employment opportunities. With the proposed development in and around the area there will be supporting facilities/ infrastructure eventually leading to the development of the area.		
69.	b) Will the proposal result	Part of the proposed land is existing quarry area and there is no vegetation in that area. The remaining land in the proposed land is		

	in any changes to the demographic structure of local population. If so, provide details.	mostly covered with native trees, she bushes etc. The topography of the less highest elevation of the lease area is MSL. As the proposed area is hill rearea is towards NW.  Sl. Areas of Intervention	ease area is hilly 109 MSL and lov	terrain. The west is 89 m of the lease
70.	c) Are the CSR proposals	No  Ol Maintenance of existing	The control of the co	Expense s (in Rs.)
	satisfactory. Give details	building  02 Sanitary facilities, drinking water and computer	02	1,00,000
		Total Total	03	2,00,000
71.	d) What are the projects benefits in terms of employment potential?  Due to the mining activity and due to the attached ancillary unit, there will be workers attracted to the project area. It is proposed to employ 40 persons in the project.  PART C			
72.	Details of NABET approved EIA Consultant engaged-Their name, address and accreditation details	ABC Techno Labs No.2,2 <sup>nd</sup> street, Thangam colony Anna Nagar west, Chennai – 600 040 Ph:+91-422-2453737		
		Summary and Conclusion	· . ·	
73.	a) Overall justification for implementation of the project.	THIS IN TRADITION OF THE ARCA, THE TOYOUTHE OF THE SAME OF THE PROPERTY OF THE		

		an area is earmarked outside the proposed mining area for compensatory mass plantation. Also, a storm water pond is proposed outside the mining area for storage of rain water and for its subsequent use so as to conserve fresh water consumption. Thus the proposed project is not likely to affect the environment or adjacent ecosystem adversely.
74.	b) Explanation of	Detailed Pre-Feasibility Report (PFR) with Environment
	how adverse impact have	Management Plan (EMP) is already submitted with E.C.
	been mitigated.	Application.

2. The proposal was placed in the 50<sup>th</sup> SEAC meeting held on 30<sup>th</sup> and 31<sup>st</sup> December, 2015. The area proposed for quarrying is 4.67 Ha which is private patta land. The life of mine expected is 10 years. The Committee was of the opinion that enough safety buffer shall be provided from the steep cutting in the existing quarry. The Committee decided to defer the proposal for the production of a revised social responsibility proposal.

As decided by 50<sup>th</sup> SEAC, the proponent submitted the revised CSR. The proposal was again placed in the 54<sup>th</sup> SEAC meeting held on 6-7<sup>th</sup> April, 2016. The Committee examined the CSR and noticed that the same is not satisfactory. The CSR scheme for 5 years activities addressing the needs of the poor and common people of nearby area has to be submitted by the proponent. Hence the item was deferred for the production of revised CSR.

- 3. The proponent thereafter submitted the modified CSR as per the decision taken by 54<sup>th</sup> SEAC and the proposal was considered in the 58<sup>th</sup> Meeting of SEAC held on 28<sup>th</sup> 29<sup>th</sup> June 2016. The committee appraised the proposal based on the Mining Plan, pre-feasibility report and all other documents submitted along with the Form I application and recommended for issuance of EC for mining subject to the general conditions and to the specific conditions that the CSR submitted shall form a part of EC.
- 4. The proposal was considered in the 57<sup>th</sup> meeting of SEIAA held on 26<sup>th</sup> August 2016. The minutes of the said meeting that the "SEAC appraised the proposal based on the Mining Plan, pre-feasibility report and all other documents submitted along with the Form I application and decided to recommend for issuance of EC for mining subject to the general conditions and to the specific conditions that the CSR submitted shall form a part of EC. Authority decided to refer the case to SEAC for site inspection and specific recommendations if any on that basis".
- 5. The proposal was considered in the 63<sup>rd</sup> Meeting of SEAC held on 4<sup>th</sup> October 2016. The committee appraised the proposal based on the mining plan (KMMCR-

2015), pre-feasibility report and all other documents submitted along with the Form I application and decided to wait for the decision from SEIAA on site inspection.

The Authority in several previous minutes reiterated the importance of site inspection for appraisal of applications for Environmental Clearances in Kerala (57.29, 57.30, 57.31, 57.32, 59.08, 60.16 etc.). The 60<sup>th</sup> meeting of SEIAA held on 27-10-2016 also decided that site inspection by SEAC is necessary to verify the statements in the application and documents submitted by the proponent and to satisfy the sufficiency of the undertakings given therein.

"Authority as a general rule decided that site inspection is required for all quarries, in so far as small quarries are also causing serious environmental concerns".

- 6. The proposal was considered in the 61<sup>st</sup> meeting of SEIAA, held on 30<sup>th</sup> November 2016. The Authority decided to return the proposal to SEAC for site inspection report at the earliest.
- 7. The proposal was considered in the 68<sup>th</sup> SEAC Meeting held on 20<sup>th</sup> & 21<sup>st</sup> February 2017. The Committee examined the suggestions made by SEIAA and decided to defer the item for site inspection.

Subsequently, field visit to the Quarry project site of Shri.M V Abraham, Ezhumattoor village, Pathanamthitta district, was carried out on 25.02.2017 by the subcommittee of SEAC, Kerala, comprising Dr. Keshav Mohan and Sri. John Mathai. The proponent and his representatives were present at the site at the time of site visit.

The project is located at Kottenkudi about 2 km northwest of Ezhumattoor. A small sized quarry was functioning in part of the proposed area. The approach road needs maintenance. Boundary pillars of the plot are erected and numbered as given in the surface plan with respective coordinates. The rock type is mostly massive Charnockite. The old working has not been with benches such that steep faces are seen in the worked out pit. Storm water is channelized into a pit in the central part that may be maintained as RWH structure. Fencing is seen all along the boundary. Dwelling units are seen around and the mandatory 100 m from quarry is provided. As a result part of the old pit is outside the proposed quarry. The quarry has a crusher unit which is located at Niranam. Two other quarries for which EC has been recommended (Ajayakumar's and Raveendran's) are within 500 m but the combined area is less than 25 ha. Floral and faunch biodiversity is not observed as the area is mostly rocky and quarried. Based on an overall evaluation of the site, issuance of EC can be recommended with the following conditions:

- At the base of the worked out pit with cliff like structure, at least 15 m buffer distance is to be provided as a no development zone as a measure of safety.
- Fencing/protective barrier to be provided on the upper edge of steep cutting that is planned as haulage.

- Sign boards are to be in place.
- 8. The proposal was placed in the 69<sup>th</sup> meeting SEAC held on 9<sup>th</sup> & 10<sup>th</sup> March 2017. The Committee appraised the proposal based on Form I, Pre-feasibility Report, Mining Plan, field inspection report of the Sub Committee and all other documents submitted with the proposal. The Committee decided to Recommend for issuance of EC subject to general conditions in addition to the following specific condition for mining.
  - 1. At the base of the worked out pit with cliff like structure, at least 15 m buffer distance is to be provided as a no development zone as a measure of safety.
  - 2. Fencing/protective barrier to be provided on the upper edge of steep cutting that is planned as haulage.
  - 3. Sign boards are to be in place.
  - 4. If any plant species endemic to Western Ghats are noticed in the area they shall be properly protected in situ or by transplanting to an appropriate location inside the lease area.

The proponent should give an undertaking before SEIAA committing to spend under CSR activities minimum amounts Rs.5 lakh (Recurring) and Rs.5 lakh (Non Recurring) towards the welfare of the local community in consultation with the local Panchayat.

- 9. The Authority in its 67<sup>th</sup> meeting of SEIAA held on 28/4/2017 decided to grant EC with the above specific conditions in addition to the general conditions subject to the production of an affidavit stating that all the general and specific conditions shall be strictly implemented. Pre-mining conditions 1-4 should be implemented before starting quarrying. The proponent should submit an undertaking for CSR activities before the issuance of EC.
- 10. The proponent has submitted the affidavit as directed. Environmental clearance as per the EIA notification 2006 is hereby accorded for the proposed building stone quarry project in Sy. No. 10/7, 11/5, 11/7, 11/8, 11/9, 13/1, 14/1-1, 14/1-2, 15/1, 15/1-1, 15/1-241, 15/1-3, 15/1-4, & 15/2 at Ezhumatoor Village, Block no 27, Mallappally Taluk, Pathanamthitta District, for an area of 4.67.11 hectares. District Kerala 686662, subject to the specific conditions—as recommended by SEAC in para 8 above, all the environmental impact mitigation and management measures undertaken by the project proponent in the Form I, EMP, PFR and Mining plan submitted to SEIAA. The assurances and clarifications given by the proponent will be deemed to be a part of these proceedings as if incorporated herein. Also the general conditions for projects stipulated for mining (items 1 to 61), appended hereto will be applicable and have to be strictly adhered to.
- 11. The clearance issued will also be subject to full and effective implementation of all the undertakings given in the application form, mitigation measures as assured in the Environment Management Plan and the mining features including progressive mine

closure plan as submitted with the application and relied on for grant of this clearance. The above undertakings and the conditions and the undertakings in Chapter 6 (Mining), Chapter 7 (Blasting), Chapter 10 (EMP) Chapter 12 (Progressive Mine Closure Plan) of the Mining Plan as submitted will be deemed to be part of this proceedings as conditions as undertaken by the proponent, as if incorporated herein.

- 12. Validity of the Environmental Clearance will be five years from the date of this clearance, subject to inspection by SEIAA on annual basis and compliance of the conditions, subject to earlier review of E.C in case of violation or non-compliance of conditions or genuine complaints from residents within the security area of the quarry.
- 13. Compliance of the conditions herein will be monitored by the State Environment Impact Assessment Authority or its authorised offices and also by the regional office of the Ministry of Environment & Forests, Govt. of India, Bangalore.
  - i. Necessary assistance for entry and inspection should be provided by the project proponent and those who are engaged or entrusted by him to the staff for inspection or monitoring.
- ii. Instances of violation if any shall be reported to the District Collector, Pathanamthitta to take legal action under the Environment (Protection) Act 1986.
- iii. The given address for correspondence with the authorised signatory of the project is Mr. M V Abraham, Pulimpallil, Niranam(PO), Kadapara, Thiruvalla, Pathanamthitta, Kerala-689 621

Sd/-JAMES VARGHESE.I.A.S, Member Secretary (SEIAA)

To.

Mr.M.V.Abraham,
Pulimpallil,
Niranam (PO), Kadapra,
Thiruvalla,
Pathanamthitta District
Kerala – 689 621.

### Copy to,

- 1. MoEF Regional Office, Southern Zone, Kendriya Sadan, 4<sup>th</sup> Floor, E&F Wing, II Block, Koramangala, Bangalore-560034.
- 2. The Additional Chief Secretary to Government, Environment Department, Government of Kerala.
- 3. The Director, Mining & Geology, Thiruvananthapuram -4.
- 4. The Member Secretary, Kerala State Pollution Control Board

- 5. The District Collector, Pathanamthitta
- 6. The District Geologist, Pathanamthitta
- 7. The Tahsildhar, Mallapally Taluk.
- 8. Chairman, SEIAA.
- 9. Website.
  - 10. S/f
  - 11. O/c

Førwarded /By Order

Administrator(SEIAA)

## STATE ENVIRONMENT IMPACT ASSESSMENT AUTHORITY KERALA

## GENERAL CONDITIONS (for mining projects)

- 1. Rain Water Harvesting facility should be installed as per the prevailing provisions of KMBR / KPBR, unless otherwise specified.
- 2. Environment Monitoring Cell as agreed under the affidavit filed by the proponent should be formed and made functional.
- 3. Suitable avenue trees should be planted along either side of the tarred road and open parking areas, if any, including of approach road and internal roads.
- 4. Maximum possible solar energy generation and utilization shall be ensured as an essential part of the project.
- 5. Sprinklers shall be installed and used in the project site to contain dust emissions.
- 6. Eco-restoration including the mine closure plan shall be done at the own cost of the project proponent.
- 7. At least 10 percent out of the total excavated pit area should be retained as water storage areas and the remaining area should be reclaimed with stacked dumping and overburden and planted with indigenous plant species that are eco-friendly, if no other specific condition on reclamation of pit is stipulated in the E.C.
- 8. Corporate Social Responsibility (CSR) agreed upon by the proponent should be implemented
- 9. The lease area shall be fenced off with barbed wires to a minimum height of 4ft around, before starting of mining. All the boundary indicators (boards, stores, markings, etc) shall be protected at all times and shall be conspicuous.
- Warning alarms indicating the time of blasting (to be done at specific timings) has to be arranged as per stipulations of Explosive Department.
- 11. Control measures on noise and vibration prescribed by KSPCB should be implemented.
- 12. Quarrying activities should be limited to day time as per KSPCB guidelines/specific conditions.
- Blasting should be done in a controlled manner as specified by the regulations of Explosives Department or any other concerned agency.
- 14. A licensed person should supervise/ control the blasting operations.
- 15. Access roads to the quarry shall be tarred to contain dust emissions that may arise during transportation of materials.
- 16. Overburden materials should be managed within the site and used for reclamation of mine pit as per mine closure plan / specific conditions.
- 17. Height of benches should not exceed 5 m, and width should not be less than 5 m, if there is no mention is the mining plan/specific condition.
- 18. Mats to reduce fly rock blast to a maximum of 10 PPV should be provided.
- 19. Maximum depth of mining from general ground level at site shall not exceed 10m
- 20. No mining operations should be carried out at places having a slope greater than 45°.
- 21. Acoustic enclosures should have been provided to reduce sound amplifications in addition to the provisions of green belt and hollow brick envelop for crushers so that the noise level is kept within prescribed standards given by CPCB/KSPCB.
- 22. The workers on the site should be provided with the required protective equipment such as ear muffs, helmet, etc.
- 23. Garland drains with clarifiers to be provided in the lower slopes around the core area to channelize storm water.
- 24. The transportation of minerals should be done in covered tracks to contain dust emissions.
- 25. The proponent should plant trees at least 5 times of the loss that has been occurred while clearing the land for the project.
- 26. Disposal of spent oil from diesel engines should be as specified under relevant Rules/Regulations.
- 27. Explosives should be stored in magazines in isolated place specified and approved by the Explosives Department.
- 28. A minimum buffer distance of 100m from the boundary of the quarry to the nearest dwelling unit or other structures, not being any facility for mining shall be provided.
- 29. 100 m buffer distance should be maintained from forest boundaries.

- 30. Consent from Kerala State Pollution Control Board under Water and Air Act(s) should be obtained before initiating mining activity.
- 31. All other statutory clearances should be obtained, as applicable, by project proponents from the respective competent authorities including that for blasting and storage of explosives.
- 32. In the case of any change(s) in the scope of the project, extent quantity, process of mining technology involved or in any way affecting the environmental parameters/impacts as assessed, based on which only the E.C is issued, the project would require a fresh appraisal by this Authority, for which the proponentshall apply and get the approval of this Authority.
- 33. The Authority reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the environment clearance under the provisions of the Environment (Protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.
- 34. The stipulations by Statutory Authorities under different Acts and Notifications should be complied with, including the provisions of Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and control of Pollution) act 1981, the Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and EIA Notification, 2006.
- The project proponent should advertise in at least two local newspapers widely circulated in the region, one of which (both the advertisement and the newspaper) shall be in the vernacular language informing that the project has been accorded Environmental Clearance and copies of clearance letters are available with the State Environment Impact Assessment Authority (SEIAA) office and may also be seen on the website of the Authority at www.seiaakerala.org. The advertisement should be made within 10 days from the date of receipt of the Clearance letter and a copy of the same signed in all pages should be forwarded to the office of this Authority as confirmation.
- 36. A copy of the clearance letter shall be sent by the proponent to concerned Grama Panchayat/ District Panchayat/ Municipality/Corporation/Urban Local Body and also to the Local NGO, if any, from whom suggestions / representations, if any, were received while processing the proposal. The Environmental Clearance shall also be put on the website of the company by the proponent.
- The proponent shall submit half yearly reports on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) and upload the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the respective Regional Office of MoEF, Govt. of India and also to the State Environment Impact Assessment Authority (SEIAA) office.
- 38. The details of Environmental Clearance should be prominently displayed in a metallic board of 3 ft x 3 ft with green background and yellow letters of Times New Roman font of size of not less than 40. Sign board with extent of lease area and boundaries shall be depicted at the entrance of the quarry, visible to the public
- 39. The proponent should provide notarized affidavit (indicating the number and date of Environmental Clearance proceedings) that all the conditions stipulated in the EC shall be scrupulously followed.
- 40. No change in mining technology and scope of working should be made without prior approval of the SEIAA, No further expansion or modifications in the mine shall be carried out without prior approval of the SEIAA, as applicable.
- 41. The Project proponent shall ensure that no natural water course and/or water resources shall be obstructed due to any mining operations. Necessary safeguard measures to protect the first order streams, if any, originating from the mine lease shall be taken.
- 42. Monitoring of Ambient Air Quality to be carried out based on the Notification 2009, as amended from time to time by the Central Pollution Control Board. Water sprinkling should be increased at places loading and unloading points & transfer point to reduce fugitive emissions.
- 43. The top soil, if any, shall temporarily be stored at earmarked site(s) only for the topsoil shall be used for land reclamation and plantation. The over burden (OB) generated during the mining operations shall be stacked at earmarked dump site(s) only. The maximum height of the dumps shall not exceed 8m and width 20m and overall slope of the dumps shall be maintained to 45°. The OB dumps should be scientifically vegetated with suitable native species to prevent erosion and surface run off. In critical areas, use of geo textiles shall be undertaken for stabilization of the dump. The entire excavated area shall be backfilled. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self-sustaining.

- 44. Catch drains and siltation ponds of appropriate size shall be constructed around the mine working, mineral and OB dumps to prevent run off of water and flow of sediments directly into the river and other water bodies. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains shall be regularly desilted particularly after monsoon and maintained properly.
- 45. Effective safeguard measures such as regular water sprinkling shall be carried out in critical areas prone to air pollution and having high levels of PM<sub>10</sub> and PM<sub>2.5</sub> such as haul Road, loading and unloading points and transfer points it shall be ensured that the Ambient Air Quality parameters conform to the norms prescribed by the Central Pollution Control Board in this regard.
- 46. Fugitive dust emissions from all the sources should be controlled regularly. Water spraying arrangement on haul roads, loading and unloading and at transfer points should be provided and properly maintained.
- 47. Measures should be taken for control of noise levels below 85 dBA in the work environment.
- 48. A separate environmental management cell with suitable qualified personnel should be set-up under the control of a Senior Executive, who will report directly to the Head of the Organization.
- 49. The funds earmarked for environmental protection measures and CSR activate should be kept in separate account and should not be diverted for other purpose. Year wise expenditure should be reported to the State Environment Impact Assessment Authority (SEIAA) office.
- 50. The Regional Office of MOEF & CC located at Bangalore shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (S) of the Regional Office by furnishing the requisite data/information/monitoring reports.
- Any appeal against this Environmental Clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
- 52. Concealing the factual data or submission of false/fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
- 53. The SEIAA may revoke or suspend the order, for non implementation of any of the specific or thisimplementation of any of the above conditions is not satisfactory. The SEIAA reserves the right to alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
- 54. The above conditions shall prevail notwithstanding anything to the contrary, in consistent, or simplified, contained in any other permit, license on consent given by any other authority for the same project.
- 55. This order is valid for a period of 5 years or the expiry date of mine lease period issued by the Government of Kerala, whichever is earlier.
- 56. The Environmental Clearance will be subject to the final order of the courts in any pending litigation related to the land or project, in any court of law.
- 57. The mining operation shall be restricted to above ground water table and it should not intersect ground water table.
- All vehicles used for transportation and within the mines shall have 'PUC' certificate from authorized pollution taking centre. Washing of all vehicles shall be inside the lease area'
- 59. Project proponent should obtain necessary prior permission of the competent authorities for drawal of requisite quantity of surface water and ground water for the project.
- 60. Regular monitoring of flow rates and water quality upstream and downstream of the springs and perennial nallahs flowing in and around the mine lease area shall be carried out and reported in the six monthly reports to SEIAA.
- 61. Occupational health surveillance program of the workers should be under taken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed.

For Member Secretary, SEIAA Kerala
